# REW İSTANBUL 2010...

## Gateway to The Booming Markets

Environmental Technologies gained priority degrees in all developed countries, partly with economic concerns - partly with social concerns.

When the case is studied for the developing countries, all the sub-branches of environmental technologies have become a major focus for investment.

REW İstanbul 2010, the 6th International Recycling, Environmental Technologies & Waste Management Trade Fair, shall introduce the industries latest improvements to public and private sector agents of Turkey and its neighbouring countries.

To meet the criterias of the European Union, Turkey is required to spend 70 billion euros in the field of Enviromental Concerns. Hence presenting a wealth of opportunity for those seeking to grow their business in this industry.

Companies both local and international involved in all subbranches of environmental technologies will take place at Rew İstanbul 2010 to showcase their products and services to the market of Turkey and its neighboring countries - Balkans, Black Sea and Caspian Sea Region, Middle East and Central Asia which all represent newly developing countries (a huge market consisting of 700 million population)

**REW İstanbul will once again provide companies and businesses the opportunity to network and further grow their business under the one roof...**

# EXHIBITED PRODUCTS AND SERVICES

1. Solid Waste
2. Water And Waste Water
3. Sludges
4. Waste Gas
5. Energy

7. Urban Environmental Cleaning Vehicles And Equipment
8. Measurement And Control Technologies
9. Services
10. Noise, Air & Soil Pollution
11. Accident Prevention, Work Safety & Risk Management
12. Science, Research And Development
13. Other

The single address in Turkey where industrialists, local administrations, organized industry zones, waste-to-product and half-product manufacturers, all public institutions, academia and academicians meet under the same umbrella.

# REW İSTANBUL jazzed up by the on - going activities!

Turkey's 13 leading municipality officials had the chance to share their decisiveness regarding climate change with the public through the signature ceremony for the document of intention included in the project "Cities for Climate Protection Campaign" which was introduced in our country by REC.

The Schedule programme with its focus on environmental problems of OIZs and the possible recommended solutions was organized in cooperation with the Higher Institution of Organized Industrial Zones (OSBUK).

In the programme jointly organized with Recyclable Packing Material Collectors and Separators Association (TUDAM), the current situation for Packing Waste was discussed and clarified. This programme, which has significantly drawn Turkish industrialists was also keenly followed by local administrative boards.

Gebze Institute of Technology conducted a meeting regarding the use of membrane system in waste water treatment and energy generation out of biological waste with attendance of authorities from the industry.

During the exhibition, Istanbul University and Gebze Institute of Technology organized continuous programmes in their booths for four days which received high-level interest.

TUBITAK, ISO & KOSGEB conducted briefings about Co-operation Possibilities with European Union - EU Departments - EU Funds and European Commercial Companies, both in seminar halls and in their own booths during the exhibition.
